MONTHLY REPORT

1 January - 31 January 1963

Materiel Support Branch
Engineering Staff

I. PROJECTS AND ACTIVITIES

25X1A2d1 1. As of 31 January 1963, certain duties previously performed by MSB were transferred to DD/R Logistics in conformity with the recent reorganization within the Agency involving former OC-SP activities. The responsibility of initiating requisitions for communications items for [REDACTED] has been assumed by DD/R. This includes follow-up action, maintenance of appropriate files and numerous other routine functions relating to supply. However, communications material requests which are prepared for these two activities will continue to be routed through MSB for technical review and sign-off. No appreciable reduction in the workload of the Branch is anticipated, since increased activities in other areas should offset the relinquishment of obligations mentioned above. The reallocation of DD/R type (ELINT) equipment in warehouse stock from the present OC allocation, the procurement of ELINT equipment for stock and several other supply matters will be resolved at a later date.

25X1A2d1 2. Seventy (70) each T-2000 Recorders and 124 each R-390A/URR Receivers have been requisitioned in support of [REDACTED] and [REDACTED]
